## COMPANY OVERVIEW

YUNG WKND LLC is a boutique software engineering and creative systems consultancy specializing in full-stack application development, cloud infrastructure, automation systems, and interactive digital experiences.

The company combines modern engineering practices with strong design sensibility and experience deploying public-facing technical systems across software engineering, infrastructure, automation, interactive systems, and technical consulting engagements.

## CORE COMPETENCIES

- Full-stack web application development
- Cloud infrastructure & AWS architecture
- API development & systems integration
- Workflow automation
- Backend architecture consulting
- Application security reviews
- AI-assisted tooling & integrations
- Mobile application development
- Interactive digital systems
- Data visualization
- Cloud-native infrastructure
- Public-facing digital experiences

## TECHNICAL EXPERIENCE

### Founding Engineer — Manifold

Built infrastructure, creator tooling, marketplace systems, and production software for a large-scale digital publishing and creator platform.

### Public Interactive Installations

Designed and deployed public-facing interactive systems in Seattle integrating physical and digital experiences.

### Full-Stack Infrastructure

Experience building cloud-native applications, APIs, automation systems, and deployment pipelines.

### Mobile & NFC Systems

Built mobile applications and NFC-linked interactive experiences integrating hardware and cloud systems.

### Generative & Visualization Systems

Designed custom rendering systems and algorithmic visualization platforms.

## DIFFERENTIATORS

---

- ✦ Combination of engineering capability and design-forward technical execution
- ✦ Experience shipping public-facing technical systems
- ✦ Modern cloud-native software architecture
- ✦ Boutique and highly responsive engagement model
- ✦ Cross-disciplinary expertise spanning infrastructure, interaction design, and software systems
- ✦ Strong focus on technical clarity, usability, and deployment quality
